Master Thesis

Title Making an Informed Choice - The Influence of Knowledge on Educational Choice

Referees Prof. Dr. Thorsten Schneider & Dr. Melanie Olczyk

Grade

Description In the German educational context, persistent social inequalities in educational attainment can be witnessed. This thesis explores whether knowledge about the educational system in Germany has an influence on educational choice. Furthermore it is postulated that if this holds and if knowledge is socially unevenly distributed, knowledge can partially explain educational inequalities with respect to social origin. The hypotheses are tested using NEPS Starting Cohort 2.

Bachelor Thesis

Title Liefern Jugendliche valide Informationen zum Bildungsstand ihrer Eltern in standardisierten Erhebungen? Befunde zu Schülerinnen und Schülern der 9. Jahrgangsstufe in Deutschland

Referees Prof. Dr. Thorsten Schneider & Prof. Dr. Roger Berger

Grade 1.0

Description Diese Arbeit untersucht mit Daten der Startkohorte 4 des NEPS, inwiefern Schülerinnen und Schüler (SuS) der neunten Jahrgangsstufe korrekt über die Bildungsabschlüsse ihrer Eltern informiert sind und adequate Proxyangaben liefern. Ferner wird untersucht, inwiefern die Nutzung von SuS-Angaben-anstelle der Eltern-Angaben—in Analysen zu Verzerrungen führt. Nur etwa jede:r zweit:e SuS macht mit den Eltern übereinstimmende Angaben. Vergleichende Auswertungen deuten auf ein Unterschätzen sozialer Ungleichheiten bei Verwendung von SuS-Angaben. Siehe auch Hovestadt & Schneider 2021 (s. Publikationen).
